

Firstly sorry about the delay.

It was caused by a few players not reporting scores and us trying to come to some arrangement to keep everything working. As you may notice there are no new additions to the League this month so the contact details sheet that you already have is still accurate.

From group 4 onwards some of you will notice that you have increased in rank, from group 6-13 the majority of you will notice that you have jumped one or two groups forwards. A few people have had to leave the league this month due to various commitments so the majority have benefitted from this. No one is in a group worse off and we have now gone back to full groups with no spaces although there are now only 16.

Just to clarify a few points that have been raised:

- Please try and space out your games and don't try and play them all in the last week, it is not our fault if you cannot get court time
- You cannot play games after the deadline has passed for that month, there is a countdown timer on the site
- If you cannot play and come to some arrangement as to who will win the walkover these will not count above played games, but will count afterwards when demotions are considered.
- If you are injured please tell us as quickly as possible
- Unless we hear word by mail to admin@singlesleague.co.uk with any issues we do not know about them
- If you do not report a score by emailing scores@singlesleague.co.uk the game did not happen

Kind Regards,

SSL
